SUMMARY

Full Stack Software Developer with strong fundamentals in designing, building, and scaling modern web applications. Proficient across frontend and backend development with a focus on clean architecture, secure systems, and performance-driven solutions. Experienced in collaborating within Agile teams and delivering production-ready software aligned with business goals.

EDUCATION

Institute of Technical Education and Research - SOA University
Bachelor of Technology in Computer Science Engineering

Bhubaneswar, India
June 2020 – June 2024

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, SQL, HTML5, CSS3
Frontend: Angular, React, Bootstrap, Responsive UI
Backend: Node.js, Express.js, REST APIs, JWT-based Authentication, OIDC Concepts
Databases: SQL Server, MongoDB
Tools & Practices: Git, Postman, VS Code, Agile, SDLC

EXPERIENCE

Software Developer

Innodigital Solutions Pvt. Ltd.

July 2024 – August 2025
Hyderabad, India

- Worked on KYC and eKYC verification modules for Univest and other BFSI domain clients, enabling seamless digital bank account opening.
- Implemented end-to-end eKYC workflows including Aadhaar and PAN verification, real-time validation, and verification status tracking.
- Integrated DigiLocker APIs to securely fetch and validate user documents during the onboarding process.
- Implemented eSign flow to complete digital consent and regulatory documentation as part of account opening.
- Developed and secured REST APIs using JWT-based authentication, aligned with OIDC concepts such as access tokens, claims-based authorization, and session validation.
- Implemented role-based access control (RBAC) for users, compliance teams, and administrators to ensure secure data access.

Web Development Intern

Bharat Intern

March 2024 – April 2024
Remote

- Developed responsive UI components and integrated frontend modules with backend APIs.
- Performed testing and debugging to improve application stability and usability.

PROJECTS

TrailSync – Activity Tracking Platform | Angular, Node.js, Express.js, MongoDB

2026

- Developed a full-stack activity tracking platform allowing users to log activities, routes, and performance metrics.
- Designed REST APIs for activity management and optimized MongoDB queries for improved performance and scalability.

AI Travel Itinerary Planner | Angular, Node.js, MongoDB

2025

- Built REST APIs integrating third-party services to generate personalized travel itineraries.
- Designed MongoDB schemas and optimized queries to improve response time.

Personal Finance Manager | MEAN Stack, AWS

2024

- Developed a secure finance management application using JWT authentication and role-based access control.
- Deployed the application on AWS and monitored system performance.

CERTIFICATIONS

- Foundations of Cybersecurity – Coursera
- Web Development Fundamentals – Udemy
